

Press release for June 15th and June 16th event.

Our Motto

I am Dr Shrenik Shah, President of World Vegan Vision.

We are holding this press conference to announce the participation of and hosting by World Vegan Vision in 7th International Conference on understanding the source and nature of consciousness and life.

This is an exciting opportunity for us, as our goal is to spread veganism throughout the world , not just for health and environmental benefits but also for compassion for animals, because their lives also matter.

In today's world , filled with cruelty and violence, veganism seems to be one of the most effective avenue for people to learn to be compassionate at each and every meal, by sympathizing for animals against the cruelty performed by animal industry, and silently protesting against it by making a choice for Vegan Lifestyle.

We believe that if consciousness is studied in its total depths , it will make every single person who is studying it, realize that, consciousness is universal and it is behind every single life form.

This awareness when brought to the dinner table, would make everyone develop respect for life of animals also, leading to adoption of vegan lifestyle, and maybe someday extrapolating this into world peace.

In this conference we have host of speakers, each one able to offer a great deal of experience in their own fields from science of life, science of consciousness and most important in the field of veganism.

Please join us for this exciting event.

Dr. Shrenik G. Shah, M.D., PC
