To Press reporter executive,

Re: **Letter of Invitation to attend the press release for Seventh International Conference on "Understanding the Source and Nature of Consciousness and Life" 15 & 16 June 2019, Rutgers University Busch Student Centre, NJ, US**

Dear Sirs/Madam

World Vegan Vision established in 1992, is hosting a prestigious seventh **Science and Scientist Conference - *Understanding the Source and Nature of Consciousness and Life***, along with Princeton Bhakti Vedanta Institute of Spiritual Culture & Science and the Sri Chaitanya Saraswat Institute of Spiritual Culture & Science. We would like to invite you to attend and participate in the press release.

The purpose of the two-day conference is to bring together researchers, vegan experts and other similar thinking people interested in the origins of life, preservation of life and consciousness, who want to engage in a dialogue with others about the deepest questions. Vegan speakers will present health benefits of Vegan foods, prevention of animal cruelty and protection of environment and global warming from Green gas effect.

There will be keynote speakers from around the world presenting on topics such as **veganism, cellular intelligence, plant consciousness, subjective evolution of consciousness vs objective evolution of bodies, science of spiritual biology, science of spiritual cosmology, scientific critique of science, teleology vs mechanism, soul hypothesis, role of cognition in biodiversity, mind-body-spirit and contribution of Eastern and Western philosophy in scientific understanding of life & its origin.**

As Max Planck, theoretical physicist, said "Science cannot solve the ultimate mystery of nature. And that is because, in the last analysis, we are a part of the mystery that we are trying to solve." During these two days, we will explore the mystery of existence and preserving life through a vegan diet & life style. We would be delighted if you would join us, and actively participate in considering different, practical approaches and theories that can help us make sense of our experiences, and live more meaningful lives for us and further generations.

For further information, and to book a place, please visit our website :
